

Mission-Ready Cyber Security

Zero Trust • Cyber-Physical Fusion • Continuous Monitoring • Audit-Ready Governance

Security engineered directly into your mission systems. Protecting state, local, and higher education infrastructure to preserve public trust while de-risking modernization across every jurisdiction.

CAPABILITY SNAPSHOT

Eliminate Lateral Movement: Micro-segmentation and identity-first controls that lock down lateral movement and drastically reduce your blast radius.

Detect Threats in Seconds, Not Days: Machine-speed detection and response engineered to shorten time-to-containment when every second counts.

Pass Your Next Audit the First Time: Immutable incident logging, transparent security posture visibility, and the reporting discipline required for CJIS, FISMA, FERPA, GLBA, and NIST compliance.

SECURING SLED INFRASTRUCTURE EOCs • Public Safety • Courts & Justice • Utilities • Higher Ed • Transit

WHY SLED AGENCIES CHOOSE UACS

Minority-owned, mission-driven, and built for the complexities of public-sector cyber security.

Cyber-Physical Convergence Expertise:

We secure both IT and OT in a single engagement — SCADA, BAS, and IoT under one architecture.

Diversity-Certified Procurement Advantage:

MBE/DBE/WOSB/SWaM certifications accelerate sole-source and set-aside awards.

Application Stewardship & Lifecycle Ownership:

We own the full security lifecycle — from architecture through operations — so nothing falls between the cracks.

Mission-Driven, Not Sales-Driven:

We recommend what you need, not what earns the highest margin — vendor-neutral, outcome-focused.

OPERATIONAL USE CASES

State & Local EOC Resilience:

High-availability comms and data integrity for EOCs — command continuity when it matters most.

Intelligent Public Safety Corridors (Vision Zero):

Hardened smart-city assets with uninterrupted first-responder connectivity.

High-Assurance Judiciary & Law Enforcement Controls:

CJIS-compliant, identity-driven access where strict security is non-negotiable.

Critical Public Utilities & Infrastructure Protection:

Cyber-physical defense for water, power, and SCADA — reducing risk at the operational edge.

University & Research Network Security:

Campus Zero Trust, research IP protection, FERPA/GLBA compliance, and federated identity across institutions.

Critical Logistics & Transit Infrastructure:

Securing networks and endpoints across transit, freight, and multi-modal logistics systems.

PARTNER ECOSYSTEM

Integrated with Trusted Enterprise Security Platforms:

Microsoft • Dell • HPE / Aruba • CrowdStrike • Okta • Palo Alto • Check Point • Sophos • Juniper

Certified MBE • DBE • WOSB • SWaM | Eligible for Sole-Source & Set-Aside Contract Vehicles

Nationwide SLED — Security that Preserves Public Trust.
