

If you thought you knew Windows
THINK AGAIN!

For years, you've trusted Microsoft Windows software to run your business. And now with Windows 10 Creators Update, it just keeps getting better; new innovations, features, security capabilities and more.

Let's Get Down to Business

Creators Update offers numerous changes IT administrators will love. There is now a Snooze Button, which allows you to delay updates for up to 3 days – say goodbye to forced restarts at the worst possible time! Another noteworthy update is the Unified Update Platform (UUP), which reduces the processing power needed for the updates and shrinks the size of the download package by up to 35%. So not only do you have control of when your systems update, but they will do it quicker.

Privacy is always an issue with computing. The new central dashboard in Creators Update lets you select what information you do and do not want to share. Windows Defender Security Center is also on the dashboard and it displays everything from device security to system health all in one place.

All Work and No Play Makes for a Dull Day

As well as a host of new business-centric features, the Creators Update also offers some consumer features that can help bring your business to the next-level.

3D and VR are everywhere today, and now they are a vital part of the Creators Update. Remember the Paint app? Well now it's loaded with tools and filters that make 3D image manipulation easy and you can even convert 2D images to 3D objects. As for VR, the Creators Update includes the Windows 10 Holographic Shell that adds support for augmented and virtual reality apps.

Creators Update elevates gaming to first-class status by adding a dedicated Gaming Options section and Game Mode – which shifts the hardware's resources around to maximize gaming performance and reduce frame rate shutting when extra oomph is needed.

We've barely touched the surface of all the new benefits of the Creators Update – and the best part is – it's FREE for current Windows 10 users. Contact us to help you access the download and walk you through the new features!

If your business is in need of updated hardware to make the most of Windows 10, we offer the top brands in the latest notebooks, desktops and tablets to help your business get ahead.
