

## **BUILT FOR BIG IDEAS,** **NO MATTER THE SIZE OF THE ROOM**

Business communications have merged to the point where voice and video are becoming as commonplace as emails and IMs. Many communication threads follow a path from an initial touch on IM or email to a one-on-one conversation and/or group meeting, often done through voice or video.

Then you run into issues with connecting devices that need multiple adapters and incompatible video platforms. Or once you're finally connected, the poor sound quality and glitchy video feeds keep your teams from making progress.

You can put the days of frustrating video-conferencing experiences behind you! Say goodbye to lousy audio and video. Start seeing and hearing everyone clearly and consistently. And give your business the tools you need to foster collaboration and creativity with Poly!

**From huddle and conference rooms to offices and cubicles, Poly delivers the best-in-class audio and video that your teams need. Whether through voip phones, conference phones, headsets or usb video bars. And the best part: poly solutions work seamlessly with microsoft teams!**

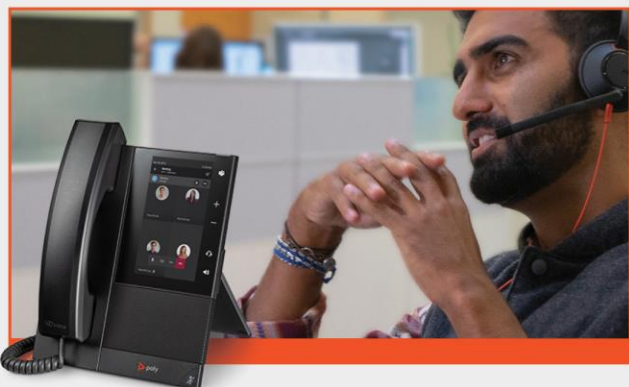

### Poly headsets

- Eliminate outside interference while on calls
- Simple to connect with wireless or Bluetooth® options
- Available with many options including single and dual earpieces with connectivity via phone, PC, or both

### Trio conferencing phones

- The familiar interface makes for ease of use; users can start conferences with the touch of a single button
- Outstanding audio and video conferencing capabilities with content sharing
- Ideal for nearly any size conference room

### CCX VoIP phones

- Experience industry's best sound quality featuring Polycom's exclusive HD Voice
- Certified for Microsoft Teams, optimized for many VoIP providers (RingCentral, Intermedia, 8X8, etc) with over 60 supported call control platforms across the globe

### Studio family of video conferencing tools

- Simple plug-n-play USB connectivity gets teams talking and sharing content quickly
- Teams experience meetings as if everyone is in the room, with noise-blocking features to help them stay focused
- Best suited for small and medium meeting rooms

**Poly powers authentic human connection and collaboration, even when users are oceans apart. Contact us today so we can get you set up with the audio and voice solutions you need to do what you do best!**
